

Floods, Droughts and Wildfires: How Climate Change is Affecting Our Weather

A Zoom presentation by **Dr. Nathan Moore**,
Associate Professor at Michigan State University

Tuesday, September 21, 2021 at 7 p.m.

Flooding in Detroit. Droughts in Africa and the Western United States. Record-setting heat waves. Nathan Moore has conducted research around the world on the regional impacts of climate change. He will discuss how climate change is affecting our weather, health and lives in the United States and other parts of the globe. Dr. Moore is an associate professor of geography at MSU with a joint appointment in the Center for Global Change and Earth Observations. This Zoom presentation is sponsored by the Green Team at Edgewood United Church, the Peace Education Center and the Capital Area Chapter of Michigan Interfaith Power & Light.
